Race Tech's Motorcycle Suspension Bible - Paul Thede - 2010-06-19

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Linda couldn't be more surprised when Ben turns out to be caring and helpful, despite his rowdy pranks and bad-news friends. And falling in love with him suddenly seems just right. But when a heartbreaking misunderstanding comes between them, both she and Ben must risk enough to trust, stitch the pieces back together—and dare a forever precious happiness. Light-Emitting Diodes - E. Fred Schubert - 2006-06-08

Revised and fully updated, the second edition of this graduate textbook offers a comprehensive explanation of the technology and physics of LEDs such as infrared, visible-spectrum, ultraviolet, and white LEDs made from III-V semiconductors. Elementary properties such as electrical and optical characteristics are reviewed, followed by the analysis of advanced device structures. With nine additional chapters, the treatment of LEDs has been vastly expanded, including new material on device packaging, reflectors, UV LEDs, III-V nitride materials, solid-state sources for illumination applications, and junction temperature. Radiative and non-radiative recombination dynamics, methods for improving light extraction, high-efficiency and high-power device designs, white-light emitters with wavelength-converting phosphor materials, optical reflectors, and spontaneous recombination in resonant-cavity structures are discussed in detail. With exercises, solutions, and illustrative examples, this textbook will be of interest to scientists and engineers working on LEDs and graduate students in electrical engineering, applied physics, and materials science.

America's Favorite Flies: 9 x 12 inches, 656 pages, full-color, case bound with cloth, Smyth sewn. America's Favorite Flies, a book by Rob Carter and John Bryan, is a landmark gathering of 224 persons from across North America, each of whom has provided a favorite fly along with comments and materials. Among the book's contents are stunning photographs of the flies and writings by the participants. The list of participants is compelling: President Jimmy Carter, Patagonia founder Yvon Chouinard, fly-fishing matriarch Joan Wulff, salt fly legend Lefty Kreh, 1% for the Planet co-founder Craig Mathews, Riverkeeper founder Robert Boyle, rock musician Huey Lewis, artist James Prosek, author Tom McGuane, and on and on. Norman Maclean's children, Jean Snyder Maclean and John N. Maclean, have given their appreciation and enthusiastic confirmation for this dedication. The book also includes approximately 100 artworks by some of North America's most beloved outdoor artists. 14 influential people in the world of fly fishing have contributed special essays. All of the profits from America's Favorite Flies are donated to two organizations whose work benefits ever healthier fisheries and waters. The James River Association is guardian of the 348-mile James River that begins with mountain trout waters and concludes amid bluefish and flounder waters where the Chesapeake Bay meets the Atlantic Ocean. The Native Fish Society plays a vital role in the conservation and recovery of wild, native fish in the Pacific Northwest, and is an active advocate both regionally and nationally.

Capital Ideas - Jeffrey M. Chwieroth - 2009-12-14

The right of governments to employ capital controls has always been the official orthodoxy of the International Monetary Fund, and the organization's formal rules providing this right have not changed significantly since the IMF was founded in 1945. But informally, among the staff inside the IMF, these controls became heresy in the 1980s and 1990s, prompting critics to accuse the IMF of indiscriminately encouraging the liberalization of controls and precipitating a wave of financial crises in emerging markets in the late 1990s. In *Capital Ideas*, Jeffrey Chwieroth explores the inner workings of the IMF to understand how its staff's thinking about capital controls changed so radically. In doing so, he also provides an important case study of how international organizations work and evolve. Drawing on original survey and archival research, extensive interviews, and scholarship from economics, politics, and sociology, Chwieroth traces the evolution of the IMF's approach to capital controls from the 1940s through spring 2009 and the first stages of the subprime credit crisis. He shows that IMF staff vigorously debated the legitimacy of capital controls and that these internal debates eventually changed the organization's behavior--despite the lack of major rule changes. He also shows that the IMF exercised a significant amount of autonomy despite the influence of member states. Normative and behavioral changes in international organizations, Chwieroth concludes, are driven not just by new rules but also by the evolving makeup, beliefs, debates, and strategic agency of their staffs.

The Norman Conquest of England (Revised Edition) - Janice Hamilton - 2013-01-01

What happens when a foreigner takes over the throne of a powerful country like England? In the case of William the Conqueror, the forced rule would have an impact that lasted centuries. William was already Duke of Normandy—part of modern-day France. In 1066, he—along with thousands of Norman soldiers—invaded England and defeated King Harold Godwinson in the Battle of Hastings. As a result of William's victory, England's ties to Scandinavia loosened and its political and cultural traditions became more tightly linked to France and the rest of mainland Europe. The Norman Conquest of England is one of world history's most pivotal moments.

The Big Jump - Travis Pastrana - 2007-08-01

Travis Pastrana, the most celebrated freestyle motocross rider in the world, knows no bounds. In 1999 he celebrated his first X Games gold by launching his bike into San Francisco Bay. Three years later, he rode straight into the Grand Canyon. On purpose. In The Big Jump: The Tao of Travis Pastrana, he makes his biggest leap yet, revealing for the first time the methods (and madness) that fuel his amazing feats. At 14 Pastrana was the youngest World Freestyle Motocross champion. At 17 he was the youngest racer ever to represent Team USA in the Motocross des Nations. Each of The Big Jump's chapters builds toward another breathtaking accomplishment, ending with the "impossible" double backflip during X Games 12 that brought Pastrana not just gold but certified legend status. With a foreword by Mat Hoffman, the godfather of BMX, The Big Jump is a fuel-injected ride into the mind and heart of Travis Pastrana.
